

Data Processing and Visualization with Jupyter Notebook

– Free Course

Data processing and visualization is important for my work or research - but how do I get started?

This one-day course for AAU employees is intended to provide the participants a working knowledge for performing data processing and data visualization. After the course the participants should be able to start applying basic data processing and data visualization methods in his/her own field of work or research.

python™

Time: 14th of February 2019, 9.00-16.00

Location: Aalborg campus (will be announced)

Sign up at: <https://aau.plan2learn.dk> (search for jupyter)

For AAU employees only

Free of charge

pandas

$$y_{it} = \beta' x_{it} + \mu_i + \epsilon_{it}$$
